

(o) Make a false statement on an application for issuance, renewal, transfer, vessel registration, or replacement of a limited entry permit.

(p) Take and retain, possess, or land groundfish in excess of the landing limit for the open access fishery without having a valid limited entry permit for the vessel affixed with a gear endorsement for the gear used to catch the fish.

(q) Carry on board a vessel, or deploy, limited entry gear when the limited entry fishery for that gear is closed, except a vessel may carry on board limited entry gear as provided in paragraph (m) of this section.

(r) Refuse to submit fishing gear or fish subject to such person's control to inspection by an authorized officer, or to interfere with or prevent, by any means, such an inspection.

(s) During the "regular" or "mop-up" season described in § 660.323(a)(2)(iii) and (iv), take and retain, possess or land sablefish taken and retained north of 36° N. lat., with longline or trap (or pot) gear, by a vessel with a limited entry permit registered for use with that vessel and endorsed for longline or trap (or pot) gear, that does not have a sablefish endorsement.

(t) During the "regular" or "mop-up" season described in § 660.323(a)(2)(iii) and (iv), take and retain, possess or land sablefish taken and retained north of 36° N. lat., with open access gear, by a vessel with a limited entry permit registered for use with that vessel and endorsed for longline or trap (or pot) gear, that does not have a sablefish endorsement.

(u) Participate in the mothership or shoreside sector as a catcher vessel that does not process fish, if that vessel operates in the same calendar year as a catcher/processor in the whiting fishery, according to § 660.323(a)(4)(ii)(B).

(v) Operate as a waste-processing vessel within 48 hours of a primary season for whiting in which that vessel operates as a catcher/processor or mothership, according to § 660.323(a)(4)(vii).

(w) Fail to keep the trawl doors on board the vessel and attached to the trawls on a vessel used to fish for whiting,

when taking and retention is prohibited under § 660.323(a)(3)(v).

(x) Fail to retain on board a vessel from which groundfish is landed, and provide to an authorized officer upon request, copies of any and all reports of groundfish landings, or receipts containing all data, and made in the exact manner required by the applicable state law throughout the cumulative limit period during which such landings occurred and for 15 days thereafter.

[61 FR 34572, July 2, 1996, as amended at 61 FR 48643, Sept. 16, 1996; 62 FR 27521, May 20, 1997; 62 FR 34674, June 27, 1997; 63 FR 34608, June 25, 1998]

EFFECTIVE DATE NOTE: At 63 FR 36617, July 7, 1998, § 660.306 was amended by adding paragraph (y), effective July 1, 1998 through Jan. 4, 1999. For the convenience of the user, the added text follows:

§ 660.306 Prohibitions.

* * * * *

(y) Fish for groundfish in violation of any terms or conditions attached to an EFP under § 660.350.

§ 660.321 Specifications and management measures.

(a) *General.* NMFS will establish and adjust specifications and management measures annually and during the fishing year. Management of the Pacific Coast groundfish fishery will be conducted consistent with the standards and procedures in the PCGFMP and other applicable law. The PCGFMP is available from the Regional Director or the Council.

(b) *Annual actions.* The Pacific Coast groundfish fishery is managed on a calendar year basis. Even though specifications and management measures are announced annually, they may apply for more than 1 year. In general, management measures are designed to achieve, but not exceed, the specifications, particularly harvest guidelines, limited entry and open access allocations, or other approved fishery allocations. Annual specifications and management measures are developed at two Council meetings and published in the FEDERAL REGISTER at the beginning of the year, according to the standards

and procedures in the PCGFMP and other applicable law.

(c) *Routine management measures.* Management measures designated “routine” at §660.323(b) may be adjusted during the year after recommendation from the Council, approval by NMFS, and publication in the FEDERAL REGISTER.

(d) *Changes to the regulations.* Regulations under this subpart may be promulgated, removed, or revised. Any such action will be made according to the framework standards and procedures in the PCGFMP and other applicable law, and will be published in the FEDERAL REGISTER.

§660.322 Gear restrictions.

(a) *General.* The following types of fishing gear are authorized, with the restrictions set forth in this section:

Trawl (bottom and pelagic), hook-and-line, longline, pot or trap, set net (anchored gillnet or trammel net), and spear.

(b) *Trawl gear*—(1) *Use.* Trawl nets may be used on and off the seabed. Trawl nets may be fished with or without otter boards, and may use warps or cables to herd fish.

(2) *Mesh size.* Trawl nets may be used if they meet the minimum mesh sizes set forth in this paragraph (b)(2). The minimum sizes apply throughout the net. Minimum trawl mesh size requirements are met if a 20-gauge stainless steel wedge, 3.0 or 4.5 inches (7.6 or 11.4 cm) (depending on the gear being measured), less one thickness of the metal wedge, can be passed with only thumb pressure through at least 16 of 20 sets of two meshes each of wet mesh.

MINIMUM TRAWL-MESH SIZE IN INCHES¹

Trawl conception type	Subarea				
	Vancouver	Columbia	Eureka	Monterey	
Bottom	4.5	4.5	4.5	4.5	4.5
Pelagic	3.0	3.0	3.0	3.0	3.0

¹ Metric conversion: 3.0 inches = 7.6 cm; 4.5 inches = 11.4 cm.

(3) *Chafing gear.* Chafing gear may encircle no more than 50 percent of the net’s circumference, except as provided in paragraph (b)(5) of this section. No section of chafing gear may be longer than 50 meshes of the net to which it is attached. Except at the corners, the terminal end of each section of chafing gear must not be connected to the net. (The terminal end is the end farthest from the mouth of the net.) Chafing gear must be attached outside any riblines and restraining straps. There is no limit on the number of sections of chafing gear on a net.

(4) *Codends.* Only single-walled codends may be used in any trawl. Double-walled codends are prohibited.

(5) *Pelagic trawls.* Pelagic trawl nets must have unprotected footropes at the trawl mouth, and must not have rollers, bobbins, tires, wheels, rubber discs, or any similar device anywhere in the net. Sweepines, including the bottom leg of the bridle, must be bare. For at least 20 ft (6.15 m) immediately behind the footrope or headrope, bare ropes or

mesh of 16-inch (40.6-cm) minimum mesh size must completely encircle the net. A band of mesh (a “skirt”) may encircle the net under transfer cables, lifting or splitting straps (chokers), but must be: Over riblines and restraining straps; the same mesh size and coincide knot-to-knot with the net to which it is attached; and no wider than 16 meshes.

(c) *Fixed gear.* (1) Fixed gear (longline, trap or pot, set net and stationary hook-and-line gear, including commercial vertical hook-and-line gear) must be:

(i) Marked at the surface, at each terminal end, with a pole, flag, light, radar reflector, and a buoy, except as provided in paragraph (c)(2) of this section.

(ii) Attended at least once every 7 days.

(2) Commercial vertical hook-and-line gear that is closely tended may be marked only with a single buoy of sufficient size to float the gear. “Closely tended” means that a vessel is within
